# TIERTRACKER®

The industry-leading tier 2 reporting platform, TierTracker, uses a patent-pending application to track your prime suppliers' spending with diverse suppliers.

The extraordinary amount of data intelligence ingrained in this tool will equip your procurement team with clear expectations for your supplier diversity spend goals and benchmarks.

TierTracker is a technology-driven and highly configurable reporting tool that makes it easier to view, manage, and measure all your data on tier 2 diverse supplier spending.

to match the look and feel that your suppliers know and trust

THE POWER OF TIERTRACKER REPORTING

We understand the headaches that come along with gathering and analyzing quarterly or annual tier 2 spend data.

Let the technology do the work for you.

TierTracker's automatic alerts remind your prime suppliers when it's time to submit their direct and indirect tier 2 spend.

What's more, with a concierge-level service plan, a dedicated ConnXus account manager will import your existing supplier certifications, conduct quarterly and one-on-one resfresher courses for prime suppliers and respond to all issues or concerns within 24 hours.

TierTracker can bring your team peace of mind with timely, accurate and visual spend category reports by location, ethnicity, prime and tier 2 suppliers, and compliance goals.

Need to present your data to the C-suite?

You can easily manipulate the data in your reporting dashboard and export in a branded PDF, Excel or CSV document.

SMARTSCRUB®

DATA ENRICHMENT AND VALIDATION

ConnXus validates and classifies your vendor data files by matching your accounts payable data files or company tax identification numbers (TIN) against our robust database. SmartScrub holds the industry-leading turnaround time of 5-7 business days, allowing you to quickly get back to business.

TIER 1 SPEND REPORTING

Enhance your data enrichment by adding on Tier 1 Spend Reporting, a rich report that displays the diversity and industry categories that your spend is currently allocated towards.

WHY SMARTSCRUB?

ConnXus offers SmartScrub, a software solution which simplifies and streamlines the tedious data enrichment and validation process. Our data is aggregated from over 250 federal, city, state and county business sources.

Deliverables include a comprehensive report and analysis of your company's annual diverse spend and percentages of spend by supplier, diversity category comparison, industry category, ethnicity, gender, geography and more.

Compare your spend across diversity categories, ethnicity, gender and more, by adding Tier 1 Spend Reporting to your SmartScrub subscription.

GLOBALLY-AGGEGATED DATA PROVIDES YOU THE MOST ACCURATE AND UP-TO-DATE SUPPLIER INFORMATION

TM

International business validation includes, but is not limited to, Canadian, United Kingdom and South African BBBEE certification

SmartScrub, the data enrichment and validation software solution from ConnXus, is the tool you need to validate, classify and easily visualize your diverse vendor data.

CONNXUS ECONOMIC IMPACT REPORT™

City Overview

Chicago is the city with the highest spend, the most suppliers and employees

An overview of how your spend with diverse suppliers is affecting Cities within the US.

DO MORE WITH COGNITIVE SUPPLIER SPEND DATA

MORE THAN JUST A REPORT

The ConnXus Economic Impact Report (EIR) equips procurement managers with meta intelligence on Tier 1 and Tier 2 diverse spend data metrics. EIR is a highly interactive breakdown of your diverse spend across the United States and within metropolitan cities.

Visualize the impacts of your inclusive supplier spend by location, diversity category, sustainability efforts, ethnicity, year-over-year comparisons, and more.

With a ConnXus EIR, you can easily build a strong business case to internal stakeholders for the development of a robust supplier diversity program.

INNOVATE, SUSTAIN AND MODERNIZE

The U.S. Department of Commerce predicts minority purchasing power may represent an increasing share of total purchasing power, from 20 percent in 2000 to 32 percent in 2045.

Modern procurement processes are shifting from reporting to meet governmental compliance requirements to intentional reporting of environmental impacts, reducing risk and increasing supply chain inclusion. ConnXus has engineered the modern tools that procurement managers need to make intelligent and informed decisions towards building a sustainable supply base.

OUR DIFFERENTIATORS

Visual, interactive and modern Economic Impact Reports are exclusive to ConnXus

Basic, advanced and comprehensive reporting options are based on the availability of your company's validated Tier 1 and Tier 2 spend data

Each city and state is broken down by industry, employees, number of suppliers, and spend for the year, and labor force impact.

Displays the number of Leadership in Energy and Environmental Design (LEED) certified businesses in your supply chain
